CONTROLLER FUNCTIONS

The controller is set to the default settings listed below. While the attacks are described as "punch" and "kick" below, some of the non-human combatants use other means of attack, like bites, knives and swords.

Note: This is the default setting. The controller functions can be changed in the Option screen under "Button Setup."

BASIC CONTROLS

+ CONTROL PAD

Note: All instructions assume that your character is facing to the right. If you're facing to the left, reverse the commands.

STORY

Jago, Spinal, Glacius, Orchid, Combo, Fulgore and Sabrewulf join Tusk, Maya and Kim Wu in an all new Fighting Extravaganza! KI Gold has more Combos more characters and more fights than any other KI game!

GAME SCREEN

The Killer Instinct tournament is organized into rounds. Each round lasts 99 seconds. During that time, each player must attempt to take away both of the other player's Life Bars by doing physical damage to them. The first Life Bar is green, and the second Life Bar is red. Between Life Bars, there will be a brief pause as the fighter who lost their Life Bar gets up off the ground, but otherwise, the action is continuous throughout the entire 99 seconds. If the 99 second timer runs out, the fighter who has the most energy in their Life Bar will win.

During a fight, you will see the players' Super Bars below the Life Bars. The Super Bar consists of little boxes that appear as the fight progresses. The Super Bar provides a visual reference of a player's ability to do Super Moves. Super Moves are special attacks. The Super Bar grows when a player's attack is blocked by an opponent. It also grows for a player who is being hit by attacks.

OPTIONS

There are several ways in which to play KI Gold. These are as follows:

ARCADE

Press START on Controllers one and two to play a two-player game. In a one-player game, you'll choose a fighter and use them to battle against computer-controlled characters.

TEAM

It is possible to fight with teams. Each player selects a team of 2-11 characters, and the fight is over when one of the teams has been defeated.

TEAM ELIMINATION

This mode is similar to the Team mode, but a team member is only eliminated if they are defeated with an Ultra, Ultimate, or they are Knocked off of the level. Knock-offs only happen on the last character.

TOURNAMENT

Two to eight players can play in a "round robin" tournament. This is where the winner of the fight stays on, and the others rotate.

PRACTICE

Practice your skills, with a full Super Bar, against an opponent who doesn't fight back.

TRAINING

This is a great place to start. The Master will teach you how to perform all of your character's Special Moves, some Combos, Combo Breakers, and Special Move Counters. If you complete each level of difficulty with a perfect score, you will earn...you figure it out!!

FOCUSED TRAINING

Practice each specific exercise found in Training.

BASIC FIGHTING THEORY

This area explains the basic fighting techniques. Study this section carefully before moving on. Developing a strong base for your fighting skills is necessary to achieve Advanced, or Master skills.

COMBO THEORY

A Combo is a series of linked attacks. The resulting Combo that you see on the screen depends on the sequence of attacks that you perform. There are seven possible steps for putting together a Combo: Opener, Auto-Double / Manual-Double, Linker, Auto-Double / Manual Double and End Finisher. You don't need to know all of these techniques yet, let's just start with the easy stuff!!

OPENERS

An Opener is a move that initiates a Combo. An Opener can be any kind of attack, or Special Move, that doesn't knock your opponent down, and allows enough time to do more hits before the opponent can move. Basic Openers include Jump-in attacks, Pressures and "Opener" Special Moves.

AUTO-DOUBLES

An Auto-Double is a single move which can be performed at certain times in a Combo, and provides an extra hit. If you perform an Opener to start a Combo, press an Auto-Double button to continue the attack.

A valid Auto-Double depends on what you opened with. Using the Auto-Double Chart, you can see that a valid Auto-Double for a FP Opener is MP or MK. It's that simple, the Auto-Double is always one button down from the valid Opener.

AUTO-DOUBLE CHART

QP: Quick Punch

MP: Medium Punch

FP: Fierce Punch

QK: Quick Kick

MK: Medium Kick

FK: Fierce Kick

END FINISHERS

End Finishers are Special Moves that will end a Combo Sequence. Each fighter has four End Finishers. Performing all four End Finishers in a single match will give the fighter a fifth End Finisher, called (obviously!) the Fifth End Finisher. For more on the Fifth End Finisher, see the Advanced Theory section.

THROWS

You can throw your opponents to prevent them from being defensive fighters (Turtles!). It's frustrating when all your opponents do is sit back, and block your attacks. Throws do little damage, and they can be reversed, but they are one way to stop Turtles! See each character's move list to learn their throw.

THROW REVERSALS

You can reverse a Throw by pressing the Control Stick, or the + Control Pad, backward and tapping your fighter's Throw button. You must do this in the first frame of your opponent's Throw. You can use the audio to queue your reversal, too. Perform your Reversal when you hear your opponent's "Throw Grunt." Throw Reversals can be reversed, too!

ADVANCED THEORY

This area goes a bit deeper into fighting strategy. The skills are more advanced, so you should have the basics down before moving on.

COMBO BREAKERS

A Combo Breaker is a Special Move that breaks an active Combo. You can only break a Combo during the Auto-Double or Manual-Double (see the master section to learn about Manual-Doubles). The rules for breaking are very simple; if the opponent is doing a punch move, break with your character's Combo Breaker motion + kick, if the opponent is doing a kick move, break with with your character's Combo Breaker motion + punch. For example, if your opponent does a valid Opener, then a punch Auto-Double, when you see the punch Auto-Double (typically two punches), do your character's Combo Breaker motion + kick...C...C...C...COMBO BREAKER!!!

LINKERS

Now that you know how to do basic Combos, it's time to make the Combo bigger! This is done with the "Linker" moves. After performing an Auto or Manual-Double, perform your character's Linker Special Move, this will not knock your opponent down. Following the Linker, you can then perform another Auto-Double, then any End Special (or just do the End Special after the Linker to lessen the chances of having your Combo broken!).

SUPER MOVES

After building up your Super Bar, it is possible to perform Super Moves. These include Super Linkers, Super End Finishers, as well as a few more things we will save for the Master section. Super Linkers will do five instead of the usual one hit for the Linker. Super End Finishers will hit four to six times at the end of the Combo.

JUGGLES

After your Combo is finished, sometimes it is possible to sneak in a few more hits! There are many ways to Juggle your opponent, these

include certain Special Moves, as well as some regular moves. With some characters, there are ways to get seven or more Juggle hits!!

THROW COMBOS

For easy Juggling, try doing your character's throw in a Combo! Throws can only be done in a Combo after an Auto-Double. Notice that the opponent will be tossed higher up than with the usual throw. This is so that you can Juggle them!!

POP-UPS

Each character has several ways they can get up from the ground quickly. These Special Moves are referred to as "Pop-ups."

TOP ATTACK

You can Top Attack your opponent by holding back on the Control Stick, or the + Control Pad, and tapping the FP, FK or MP depending on your fighter. Top Attacks are effective against a ducking or blocking opponent. You cannot follow a Top Attack with an Auto-Double, but you can follow it with a Pressure-Double, Manual-Double, and certain Special Moves.

MASTER THEORY

This area is for the elite fighters. To be a master fighter, you must learn the basic and advanced fighting techniques. Some of the techniques in this area are very difficult to perform. There is still a lot to learn!!

COUNTERING THEORY

The main thing which separates a Master KI Gold player from the crowd, is understanding the methods with which you can counter your opponent's attacks. There are several different types of Counters in KI Gold, which are explained below.

ROCK, PAPER, SCISSORS PRIORITY

Each Character in KI Gold has three Special Moves which can be represented by the ancient game of Rock / Paper / Scissors. If you don't know what this is, TOUGH!! Okay, the idea is that there is a triangular relationship between these moves. "Rock" beats "Scissors," "Scissors" beats "Paper" and "Paper" beats "Rock". Therefore, no move is unbeatable!! For example, for Jago vs. Jago, Wind Kick beats Slide, Slide beats Laser Sword, and Laser Sword beats Wind Kick.

THROUGH PROJECTILES

Each character has a Special Move which can go under, over or through projectiles. Each character also has a Super Move, which will also perform this function.

AIR COUNTERS

Once again, it's the Rock / Paper / Scissors game! When both characters are jumping, Fierce moves beat Medium moves, Medium moves beat Quick moves, and Quick moves beat Fierce moves. For example, a jumping Quick Punch or Kick will ALWAYS beat a jumping Fierce Punch or Kick.

POP-UP COUNTERS

Each character has several ways they can "Pop-up," and there are ways to counter all of them!! I will leave it up to you Master players to figure which move counters which Pop-up. Once again, EVERY Pop-up can be countered!!

OTHER SPECIAL MOVES

Remember ANY Special Move can be countered. For an example, a jump-in Fierce Punch or Kick will beat Jago's Tiger Fury if timed correctly, but an uppercut will always beat a jump-in Fierce Kick, but lose to a jump-in Medium Punch or Kick!

This counter stuff goes ON AND ON. (See if you figure out all of the counters, out guess your opponents attacks, and be the Master of Kl Gold!!!)

MANUAL-DOUBLES

Manual-Doubles are very useful, but hard to master. This move can replace an Auto-Double in a Combo, be performed after an Auto-Double and work as an Opener. The advantage of the Manual-Double is that it is harder to break. To perform a Manual-Double, rapidly press Fierce Punch or Kick, followed by Medium Punch or Kick. Therefore, each character has four Manual-Doubles, FP-MP, FP-MK, FK-MP, FK-MK. Typically, the Control Pad/Stick should be in the neutral position during Manual-Doubles, but some of these four will work while either holding towards, or away from, your opponent so that you can "Charge" your next Special Move.

PRESSURE-DOUBLE

Each character has a move called the Pressure-Double. There are many uses for this move, it can act as an Opener, or an "Auto-Double", and it will even Juggle if used correctly!

PRESSURE-COMBOS

Pressure-Combos are Combos performed on a blocking opponent. When you are doing this, the opponent cannot move, but they only take a small amount of damage. The advantage is that Pressure-Combos fill up your Super Bar VERY QUICKLY!! There are many ways to perform Pressure-Combos, but the two main methods are to either perform a Pressure-Double into a Special Move, or a Manual-

Double into a Special Move. The biggest Super Bar gain will be obtained by doing the Pressure / Manual-Double into one of your character's "Rock / Paper / Scissors" Special moves.

PRESSURE-BREAKER

So the best Super Bar gain is from the Pressure-Combo which ends with a "Rock / Paper / Scissors" Special Move, well this can be "broken"!! If your opponent does a Pressure-Combo which ends with a "Rock / Paper / Scissors" move, do your countering Special Move, and you will come out of your block stance, and counter their Pressure-Combo!! There is a lot to this part of the game. Live it, learn it, and win!!

ULTRA BREAKERS

Break an Ultra!?!?! You BET!!! Just perform your characters Ultra Breaker Super Move, when the opponent's Ultra Combo is starting, and Boom...the fight is still on!

SHADOW COMBOS

Some characters have a Shadow / through fireball move. Just use this move as an Opener, and the entire Combo will be "shadowed"!

SPEED-UP COMBOS

There are two ways to do "Speed-up" Combos. The first is fairly easy, but only works on the End Finisher. Instead of doing the End Special motion, and pressing the appropriate button, do the motion, and RELEASE the appropriate button. Of course, this works better on multi-hit End-Specials. The Fifth End Finisher cannot be sped up.

The second way to speed up a Combo is much trickier, but can work for the whole Combo. All you have to do is press the Auto-Double button immediately as the Opener hits the opponent, and the Auto-Double, will come out MUCH faster than usual. This not only looks great, it is hard to break. To see a good example of this style of Speed-up Combo, fight the computer Kim Wu on the hard or extra hard level. She will be glad to show you how fast a Combo can get. Any character can do a Combo this fast, using this method.

SLOW MOTION END FINISHERS

These look really great, ESPECIALLY at the end of a Speed-up Combo!! To do this, just do the Control Pad/Stick motion twice before pressing the End Special button. Again, these work much better when your End Specials are powered up to four hits!!

AIR DOUBLES

An "Air Double" is a way to Combo someone who is jumping at you. All you have to do is hit a jumping opponent, while you are jumping, then perform the Air Double Special Move, using the strength one down from the button you did the first hit with. For example, for Jago, after connecting with a jumping FK, do a Medium Wind Kick. You can then Juggle several different ways, if you have discovered them.

ULTRA

To perform an Ultra Combo, just do the Ultra Combo Special Move at the end of a Combo when your opponent's Life Bar is flashing red. Ultras will be longer, based on the power of your End Special. For example, if you have done only one End Finisher during the fight, the Ultra will be short. If you have done all four End Finishers, plus the Fifth End Finisher during the fight, the Ultra will be LONG! It is possible to do your character's Super End Finisher at the end of the Ultra, for some extra hits!!

REALLY LONG ULTRAS

OK, here's the key to the 70+ hit Ultras. Just do Parry Opener, Auto-Double, Manual-Double, Super-Linker, Auto, Manual, Super-Linker, Auto, Manual, Super-Linker, Pressure-Double, Super-Linker, Pressure-Double, Ultra motion, Super End Finisher (the Super Bar re-fills as the Ultra is going on). You must have two full Super Bars, and have done all five End Finishers to get it around 70 hits. GOOD LUCK!!

MINI-ULTRA

At the end of the opponent's first Life Bar, it is possible to do a "Mini-Ultra". Just do the Mini-Ultra Special Move at the end of a Combo, when the opponent's first Life Bar is empty. The only catch is that you need to do at least one End Finisher during the match, before you can do a Mini-Ultra.

ULTIMATES

To really end the fight with style, try one of your character's two Ultimates. One of these must be done in a Combo, but the other one can be done either in or outside of a Combo (O-Combo Ultimate). To perform an Ultimate, simply do the Ultimate Special Move motion when your opponent is in their flashing red Life Bar.

STAGE KNOCKOFFS

In several of the levels, it is possible to knock your opponent off of the level. To do this, you have to do certain End Specials, while standing in a certain location in the level. Some of these include; off of the side of Spinal's ship, off the top of Orchid's Roof, (our favorite) off of Kim Wu's stage and onto the train tracks in Combo's level. There are more, you figure them out!!

PARRY

The Parry move is a very effective way to stop an opponent's Top Attack, or standing regular move. To Parry, just press back and hold Quick Punch. Your character will animate quickly in their regular blocking motion to warn your opponent, so be careful. After successfully performing a Parry, you can perform any Opener Special Move, or do one of the next two Parry following moves.

PARRY OPENER

Each character, who can Parry, has an Opener which will hit three times instead of the normal one hit. After performing the Parry, it is possible to do three Auto-Doubles instead of the normal two. For example, it is possible to do the following Combo; Parry triple, Auto, Linker, Auto, Linker, Auto, End Special. If you are really feeling tough, insert some Manual-Doubles after the Auto-Doubles to really make your Combo big!!

PARRY DIZZY

After a successful Parry, one of your character's Special Moves will dizzy your opponent. You decide what to do against the opponent, while they are dizzy!

FIGHTERS

This instruction manual, while quite extensive, does not tell all. There are literally over a million moves and Combos that you can perform. We strongly encourage you to experiment with the different fighters. You will find that some of your Special Moves act as Openers, Linkers and End Finishers.

Follow the stages (Basic, Advanced and Master) to become a complete fighter. After you've mastered the techniques described in this manual, challenge yourself to discover more. In Killer Instinct Gold, even a Master can learn a trick or two!

EXAMPLE COMBOS

	OPENER	AUTO-DOUBLE	LINKER	AUTO-DOUBLE	ENDER
JAGO	1 Laser Blade (FP)	Auto (MP / MK)	—	—	Windkick (FK)
	2 Windkick (FK)	Auto (MP / MK)	Laser Blade (MP)	Auto (QK / QP)	Tiger Fury (FP)

WARNING: Copying of any Nintendo game is illegal and is strictly prohibited by domestic and international copyright laws. "Back-up" or "archival" copies are not authorized and are not necessary to protect your software. Violators will be prosecuted.

This Nintendo game is not designed for use with any unauthorized copying device. Use of any such device will invalidate your Nintendo product warranty. Nintendo (and/or any Nintendo licensee or distributor) is not responsible for any damage or loss caused by the use of any such device. If use of such device causes your game to stop operating, disconnect the device carefully to avoid damage and resume normal game play. If your game ceases to operate and you have no device attached to it, please contact your local authorized Nintendo retailer.

The contents of this notice do not interfere with your statutory rights.

This manual and other printed matter accompanying this game are protected by domestic and international copyright laws.

The rental of this game without permission of Nintendo or its licensees is strictly prohibited.

Nintendo Consumer Assistance Hotline

1-800-255-3700 (U.S. and Canada)

Or your local authorized Nintendo retailer.

WARRANTY AND SERVICE INFORMATION

REV-1

3-MONTH LIMITED WARRANTY (For Hardware, Game Paks, & Accessories)

Nintendo of America Inc. ("Nintendo") warrants to the original purchaser that the product (hardware, game paks and accessories) shall be free from defects in material and workmanship for a period of three (3) months from the date of purchase. If a defect covered by this warranty occurs during this three (3) month warranty period, Nintendo will repair or replace the defective product or component part, at its option, free of charge.

ADDITIONAL 3-MONTH LIMITED WARRANTY (Hardware only)

Nintendo warrants to the original purchaser that the hardware product shall be free from defects in material and workmanship for an additional three (3) months beyond the original 3-month warranty period described above. If a defect covered by this warranty occurs during this additional 3-month warranty period, Nintendo will repair the defective hardware product or component free of charge. The original purchaser is entitled to this additional 3-month limited repair warranty only if the Consumer Proof of Purchase Card (attached to the hardware packaging when sold) is returned promptly after the date of purchase to Nintendo by the original purchaser or the original purchaser's retailer.

WARRANTY SERVICE OR REPAIR/SERVICE AFTER EXPIRATION OF WARRANTY

You may need only simple instructions to correct any problem with your product. Call the Consumer Assistance Hotline at 1-800-255-3700 rather than going to your retailer. Hours of operation are 6 a.m. to 9 p.m., Pacific Time, Monday - Saturday, and 6 a.m. to 7 p.m., Pacific Time, on Sundays (times subject to change). If the problem cannot be solved over the telephone, you will be referred to the nearest NINTENDO AUTHORIZED REPAIR CENTERSM or you will be offered express factory service through Nintendo. In some instances, it may be necessary for you to ship the complete product, FREIGHT PREPAID AND INSURED FOR LOSS OR DAMAGE, to the nearest service location.

WARRANTY LIMITATIONS

THIS WARRANTY SHALL NOT APPLY IF THIS PRODUCT: (a) IS USED WITH PRODUCTS NOT SOLD OR LICENSED BY NINTENDO (INCLUDING, BUT NOT LIMITED TO, NON-LICENSED GAME ENHANCEMENT DEVICES, ADAPTERS, AND POWER SUPPLY DEVICES); (b) IS USED FOR COMMERCIAL PURPOSES (INCLUDING RENTAL) OR IS MODIFIED OR TAMPERED WITH; (c) IS DAMAGED BY NEGLIGENCE, ACCIDENT, UNREASONABLE USE, OR BY OTHER CAUSES UNRELATED TO DEFECTIVE MATERIALS OR WORKMANSHIP; OR (d) HAS HAD THE SERIAL NUMBER ALTERED, DEFACED, OR REMOVED.

ANY APPLICABLE IMPLIED WARRANTIES, INCLUDING **WARRANTIES OF MERCHANTABILITY** AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY LIMITED IN DURATION TO THE WARRANTY PERIODS DESCRIBED ABOVE (3 MONTHS OR 6 MONTHS, AS APPLICABLE). IN NO EVENT SHALL NINTENDO BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES RESULTING FROM THE BREACH OF ANY IMPLIED OR EXPRESS WARRANTIES. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS OR EXCLUSION OF CONSEQUENTIAL OR INCIDENTAL DAMAGES, SO THE ABOVE LIMITATIONS MAY NOT APPLY TO YOU.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. Nintendo's address is as set forth on the back cover of this manual.

This warranty is valid only in the United States.
